## Mach™ 6

Coin sorter/counter

With optional WAVE™ coin authentication

The Mach 6 is a fast, compact coin sorter/counter configurable for tabletop or higher volume applications requiring bagging capability.

Mach 6 is the perfect solution for medium size bank branches, retailers, transportation authorities and even small casino operations. Highly configurable, Mach 6 can track and consolidate management information, eliminating the need for manual reporting.

Glory Global Solutions is a World Expert in cash management, delivering technology and solutions that provide security, productivity and innovation to our customers. These solutions are supported by the technical expertise of GLORY Group of Japan, the pioneer in development and manufacture of money handling machines across the financial, retail, vending machine, amusement and gaming industries for nearly 100 years.

Across the world, Glory Global Solutions is trusted by thousands of organisations to ensure their cash is managed securely and efficiently whilst delivering the ultimate in productivity. 2,500 professionals, including over 1,300 service and support staff and 350 business partners cover over 128 countries delivering these solutions – wherever money moves.

## Ease of use

Utilising minimal counter or floor space, the Mach 6 can be accommodated into virtually any work environment. Its superior design offers functionality, efficiency and is ergonomically designed to enable fast processing of coin with minimal fatigue on the operator.

Selectable bag stops with multiple total levels are easily accessed via a direct keypad. A two-line alpha-numeric display clearly conveys operational messages at a glance. The Mach 6 features a lockout security function to protect vital operating information.

## Coin authentication

With the addition of the coin authentication option, utilising patented WAVE sensor technology; the Mach 6 becomes the ideal machine to assist in the rejection of intrusive or counterfeit coins. Coin authentication increases accountability while maintaining the highest degree of accuracy.

## Flexible

The Management Information Control System (MICS), included as standard, provides three levels of memory and allows other media – such as cheques, vouchers or rolled coin to be entered via the keypad. Notes can be entered manually or automatically transferred if a note counter is interfaced, ensuring a comprehensive audit trail.

For applications where consumer coin counting is offered as a customer service, the Mach 6's Fee Key enables either a whole value amount or a fixed percentage to be automatically applied as a transaction fee.

# Mach 6 Technical Information

<b>Processing speed</b>	Up to 3000 coins per minute
<b>Coin size range</b>	Diameter: 15.0 to 32.4 mm Thickness: 1.0 to 3.0 mm Differential: 0.5 mm minimum
